Blog

- Blog (skraćeno od **veb log**) predstavlja lični veb sajt. Glavni sadržaj bloga su:
 - razni tekstovi, slike, multimedijalni zapisi i dr.
 - Na blogu korisnik može da ostavlja razne tekstove, članke...
 - Čitaoci bloga mogu da ostavljaju komentare, da preuzimaju određene fajlove, itd.
- Vlasnik bloga ne mora poznavati html, php niti bilo koji drugi programski jezik da bi mogao da kreira sajt.

Početak

- Kada kreirate sajt potrebno je da kupite domen (veb adresa) i platite server koji će hostovati vašu veb prezentaciju.
- Jedna od mogućnosti:
- <https://www.hostgator.com/>

Instalacija Wordpress-a

- Podrazumeva instalaciju Xampp servera, onda i samog Wordpress-a.
- Instalacija Xampp:
<https://www.apachefriends.org/download.html>
- Wordpress:
<https://wordpress.org/download/>

XAMPP

- Instalacija je trivijalna i kada se završi potrebno je u panelu aktivirati Apache i MySQL servere.

Service	Module	PID(s)	Port(s)	Actions
<input type="checkbox"/>	Apache	12028 15596	80, 443	Stop Admin Config Logs
<input type="checkbox"/>	MySQL	19080	3306	Stop Admin Config Logs
<input type="checkbox"/>	FileZilla			Start Admin Config Logs
<input type="checkbox"/>	Mercury			Start Admin Config Logs
<input type="checkbox"/>	Tomcat			Start Admin Config Logs

Wordpress

- Unutar xampp foldera postoji htdocs
C:\..\xampp\htdocs – u njemu treba napraviti folder u kome će biti sajt npr. *Moj_sajt*.
- Otpakovati zipovan wordpress fajl i prebaciti ga u folder *Moj_sajt*.

Localhost

- Sada se u veb pregledaču ukuca localhost
- Izabere phpMyAdmin i kreira nova baza

Kontrolna tabla - Dashboard

The image shows a screenshot of the WordPress Dashboard. At the top, there is a navigation bar with a home icon, the text "Moj sajt", a comment icon with "0", and a "New" button. Below this is a sidebar menu with the following items: Dashboard (highlighted), Home, Updates, Posts, Media, Pages, Comments, Appearance, Plugins, Users, Tools, Settings, and Collapse menu. The main content area is titled "Dashboard" and contains a "Welcome to WordPress!" message with the text "We've assembled some links to get you started:". Below this are three columns of quick actions: "Get Started" with a "Customize Your Site" button and a link to "change your theme completely"; "Next Steps" with links to "Write your first blog post", "Add an About page", "Set up your homepage", and "View your site"; and "More Actions" with links to "Manage widgets", "Manage menus", "Turn comments on or off", and "Learn more about getting started". At the bottom, there are three widget areas: "Site Health Status" (showing "No information yet..."), "Quick Draft" (with fields for "Title" and "Content"), and "At a Glance" (showing "1 Post" and "1 Page"). A dashed box on the right side of the dashboard is labeled "Drag boxes here".

Stavke levog menija

- **Posts** – deo administracije u kome se vrši unos, izmene i brisanje svih članaka na sajtu. Članci predstavljaju tekstove sa vremenskom dimenzijom, tipa vesti, blog postovi i tome slično.
- **Media** – Svi multimedijalni materijali koji se upload-uju na sajt. Praktično se ova stavka retko koristi jer se unos vrši kod samih članaka.

Stavke levog menija

- **Links** – deo administracije u kome se vrši dodavanje, brisanje i izmene linkova npr. prijatelja.
- **Pages** – važan deo administracije u kome se vrši unos, izmene i brisanje svih stranica sajta koje nemaju vremensku dimenziju, kao što su kontakt strane, strana o nama i tome slično.
- **Comments** – deo administracije u kome se vrši objava, brisanje, editovanje komentara koje posetioци ostave na sajtu.

Stavke levog menija

- Stavke **apperance, plugins** predstavljaju sistemski deo WordPress administracije i biće opisane u nastavku.
- **Users** – predstavlja odeljak administracije u okviru koga se dodaju novi korisnici, blogeri, administratori i autori tekstova.

Razlika između stranica i članaka

Page - stranica

- Stranica sajta;
- Npr. stranica Kontakt, Galerija slika itd;
- Nezavisan entitet – postoji sama za sebe;
- Navigacioni meni najčešće vodi do stranica;
- Nije „time-sensitive“, prioritet stranice ne zavisi od vremena kreiranja.

Post - članak

- Deo je kolekcije;
- Blogovi imaju listu postova;
- On je „time-sensitive“, što znači da je najnoviji uvek na vrhu.

Preporuka

- Sve podrazumevane stranice *Pages* se brišu.
- Svi podrazumevani komentari *Comments* se brišu.
- Brišu se i postojeći *Plugin*-ovi.

Site identity

The image shows the WordPress Customizer interface for a site named "Zanimljivosti". The left sidebar displays the "Site Identity" settings, which are highlighted with a yellow box. The settings include:

- Logo:** A dashed box labeled "Select logo".
- Site Title:** A text field containing "Zanimljivosti".
- Tagline:** A text field containing "Od svaga po malo...".
- Display Site Title and Tagline**
- Site Icon:** A section with a description: "Site Icons are what you see in browser tabs, bookmark bars, and within the WordPress mobile apps. Upload one here!" and a note: "Site Icons should be square and at least 512 x 512 pixels".

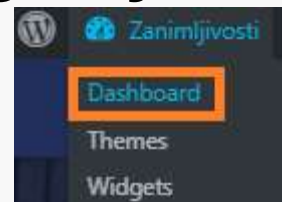

The right side of the image shows a live preview of the site header. The header is dark blue and features the site title "Zanimljivosti" and tagline "Od svaga po malo..." in white text, both highlighted with a yellow box. Below the header is a "HOME" button and a "Latest Post" section with a "Hello world!" post.
